## Registration form EIKi-German

The parents are taught separately from their children. They receive basic training in the German language for everyday activities in order to gain more confidence in dealing with other people and institutions. With this project, the municipality of Tafers wants to make it easier for families to enroll their children in school. The German language is no longer completely foreign to the children and it makes it easier for the parents to work with the teachers.

In case of inability to attend, participants must cancel their registration with Mrs. Rigolet, course instructor for adults (Tel. 079 762 60 31). In case of premature termination of the course, the teaching material (book, possibly CDs) must be returned to the course instructor.
